agrofreshstore.com

More fruits.
More fresh-picked quality.

SmartFresh™ technology has worked wonders
for the quality of apples. Now, put SmartFresh
SmartTabs to work for your other crops,
regardless of harvest size.

AF_SFST_017.2

Before you begin:

- Confirm that the application room or space is ready for the SmartFresh™ technology application.
- Do you have the necessary components to make the treatment?
- **REMEMBER:** Each kit can activate a maximum of 10 SmartFresh SmartTabs.

CROP	NUMBER OF SMARTFRESH SMARTTABS TO USE
Apple, Asian Pear, Avocado, Broccoli	1 SmartFresh SmartTab per 120 cubic feet
Pear	1 SmartFresh SmartTab per 200 cubic feet
Melon, Tomato, Kiwifruit, Persimmon, Plum, Apricot, Peach, Nectarine	1 SmartFresh SmartTab per 240 cubic feet

1. Ensure that you have the correct number of SmartFresh SmartTabs for the treatment.
2. Fill the space or room where the application will be made with the fruits to be treated.
3. Open the SmartFresh Activator Kit. Leave the container with the Activator Solution inside the foam block.

Remove the cap from the container.

Confirm that the container cap has a small hole to allow the active ingredient to be released into the treatment space.

4. Place the TWO BLUE ACTIVATOR TABLETS into the inverted container cap.

5. Add the correct number of SmartFresh SmartTabs (as per the label requirement) into the inverted container cap.

6. Peel open the foil seal on the Activator Solution container.

IMPORTANT:

Before adding the tablets to the liquid, make sure you are ready to complete steps 7, 8 and 9 quickly, as the product will start to release in 5 minutes.

7. Place all the tablets into the container with the Activator Solution.

Place the cap back on the container.

8. Place the foam block with the container on a stable, level surface inside the space to be treated.

9. Close the treatment room doors tightly and ensure that they remain closed during the entire treatment period.

DO NOT OPEN THE DOORS BEFORE THE APPLICATION HAS FINISHED.
