SmartFresh™
InBox Flex

Maintain harvest quality – even without a sealed room!

Lasting freshness and quality – when you need it, where you need it.

For 20 years, SmartFresh has been the foundation of freshness protection, helping deliver the best produce quality to consumers who demand it.

Now it's more versatile than ever, with new SmartFresh™ InBox Flex – for operations that are moving fast, where flexibility is key! SmartFresh InBox Flex keeps you in control of freshness and quality protection.

Benefits:

- Maintain quality: firmness, size, color, weight
- Reduced food loss and food waste / packout improvement

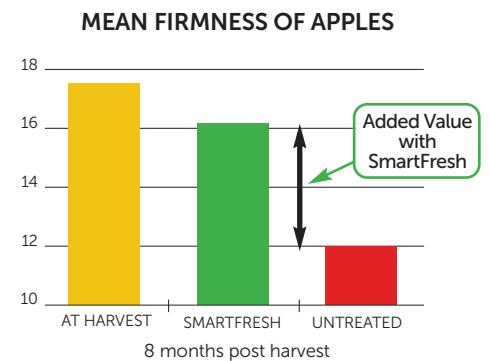

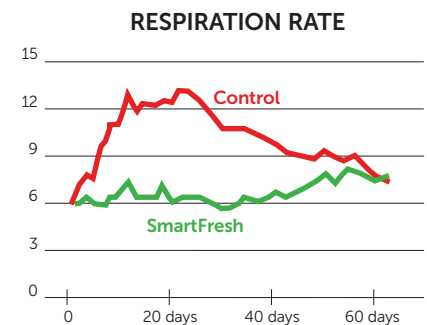

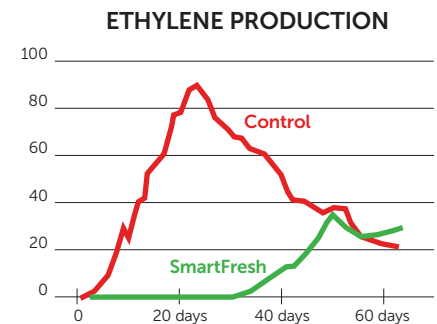

How it Works:

- Manages fruit response to ethylene – a plant's natural hormone that accelerates maturation and softening.
- Slows respiration and the ripening process

Easy to Use:

No need for an airtight room – SmartFresh InBox Flex provides powerful quality protection on the go. Just place the sachet in the heavyweight storage bin with the produce and it's ready for internal transit or storage.

SmartFresh™ helps manage ethylene from Day 1
