LETTER OF ASSURANCE

To Whom It May Concern:

The SmartFresh™ Quality System is designed to maintain produce quality during storage by blocking ethylene from triggering over-ripening of harvested fruit. SmartFresh™ products leave no residue on fruit and have been determined to be a safe and effective quality management tool.

Today, SmartFresh™ products are registered in over 40 countries and AgroFresh continues to seek registrations in additional markets. The SmartFresh Quality System has gained global acceptance and has been thoroughly reviewed and approved by the United States Environmental Protection Agency (EPA), the European Food Safety Authority (EFSA), the European Union (EU), and the Canadian Pest Management Regulatory Agency (PMRA).

The U.S. EPA registration numbers are as follows:

- SmartFresh™ Technology EPA Registration Number 71297-2
- SmartFresh™ SmartTabs EPA Registration Number 71297-3
- SmartFresh™ ProTabs EPA Registration Number 71297-10
- SmartFresh™ InBox (0.014% 1-MCP) EPA Reg. No. 71297-5
- SmartFresh™ InBox Flex (3.3% 1-MCP) EPA Reg. No. 71297-2

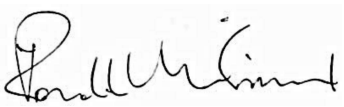

The PMRA registration number for Canada is as follows:

- SmartFresh™ Technology PMRA Registration Number 27778
- SmartFresh™ Technology for Tomatoes PMRA Registration Number 28569
- SmartFresh™ ProTabs PMRA Registration Number 30872

Our customers also confirm the following:

- All SmartFresh™ products application spaces have been verified to be sufficiently airtight in order to achieve successful SmartFresh™ applications.
- SmartFresh™ products application room identification and measurements have been verified to achieve accurate dosage.
- All SmartFresh™ products applications were performed by trained personnel.

Respectfully,

Ronald McCrimmond, Chief Operations Officer
